

# Teardrop Banner Installation Guideline

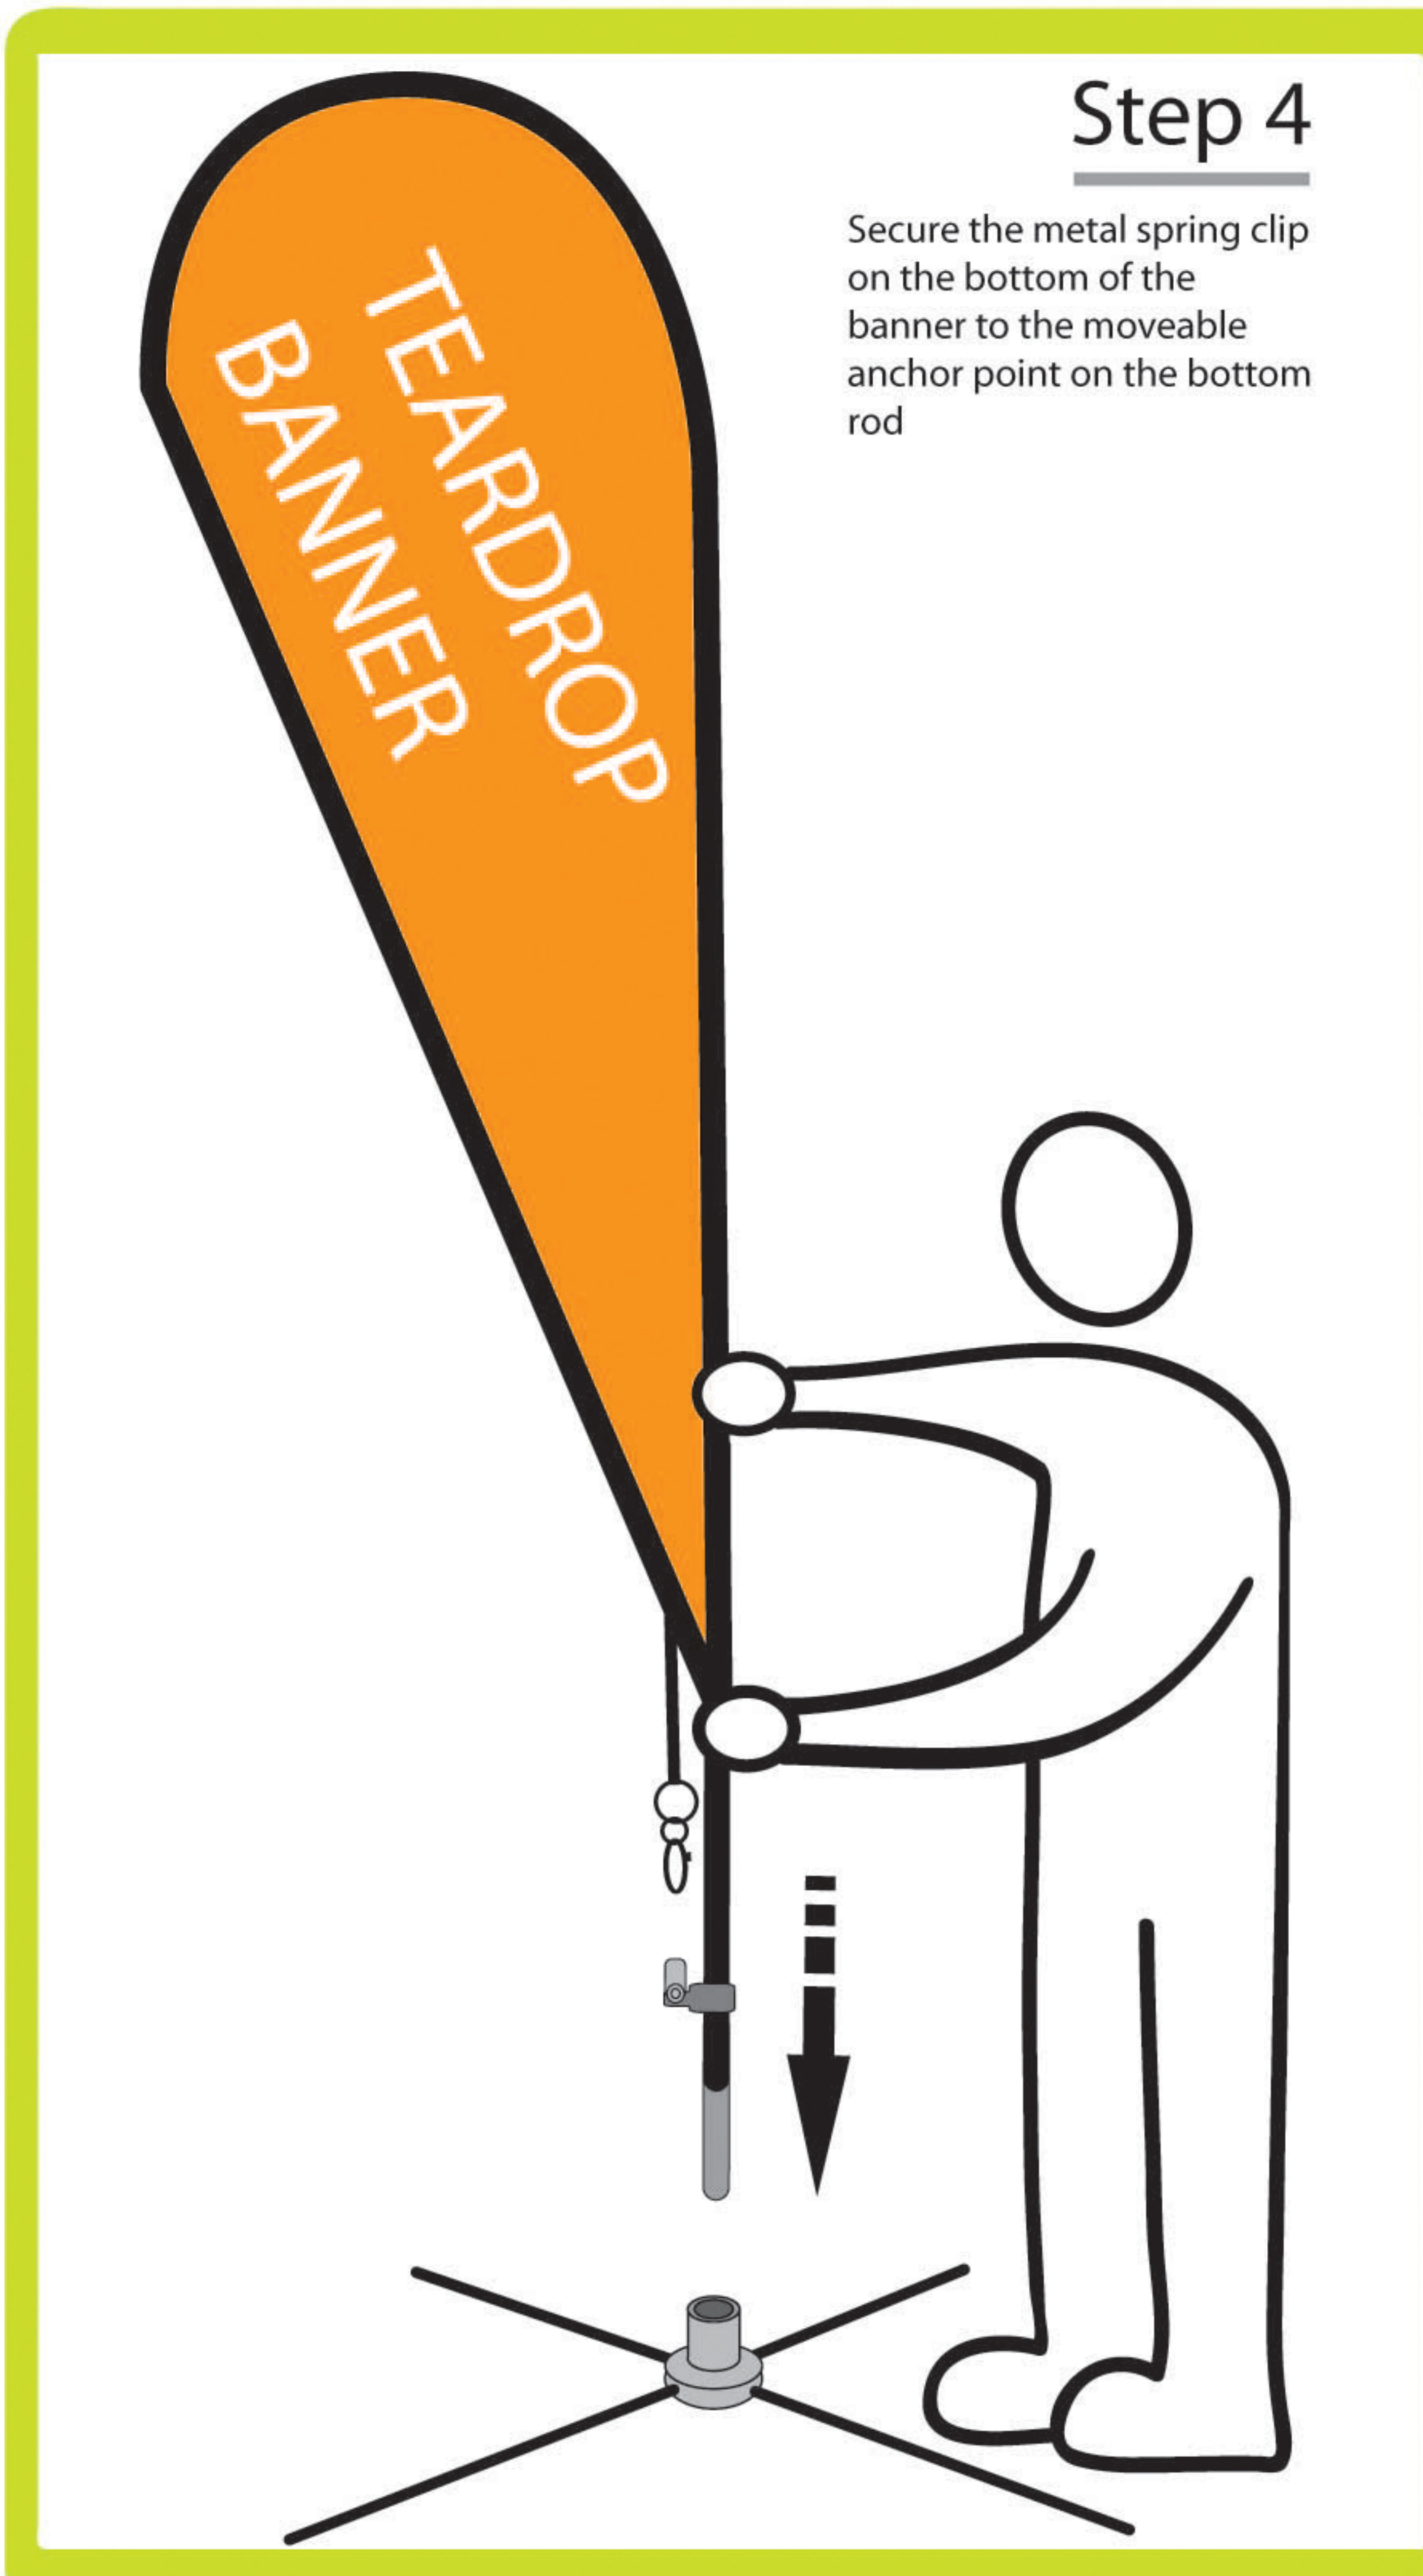

## Step 1

Assemble the first 2 tapered fibreglass, starting with the thinnest rod and then adding the next size. Make sure that they are fit tightly together.

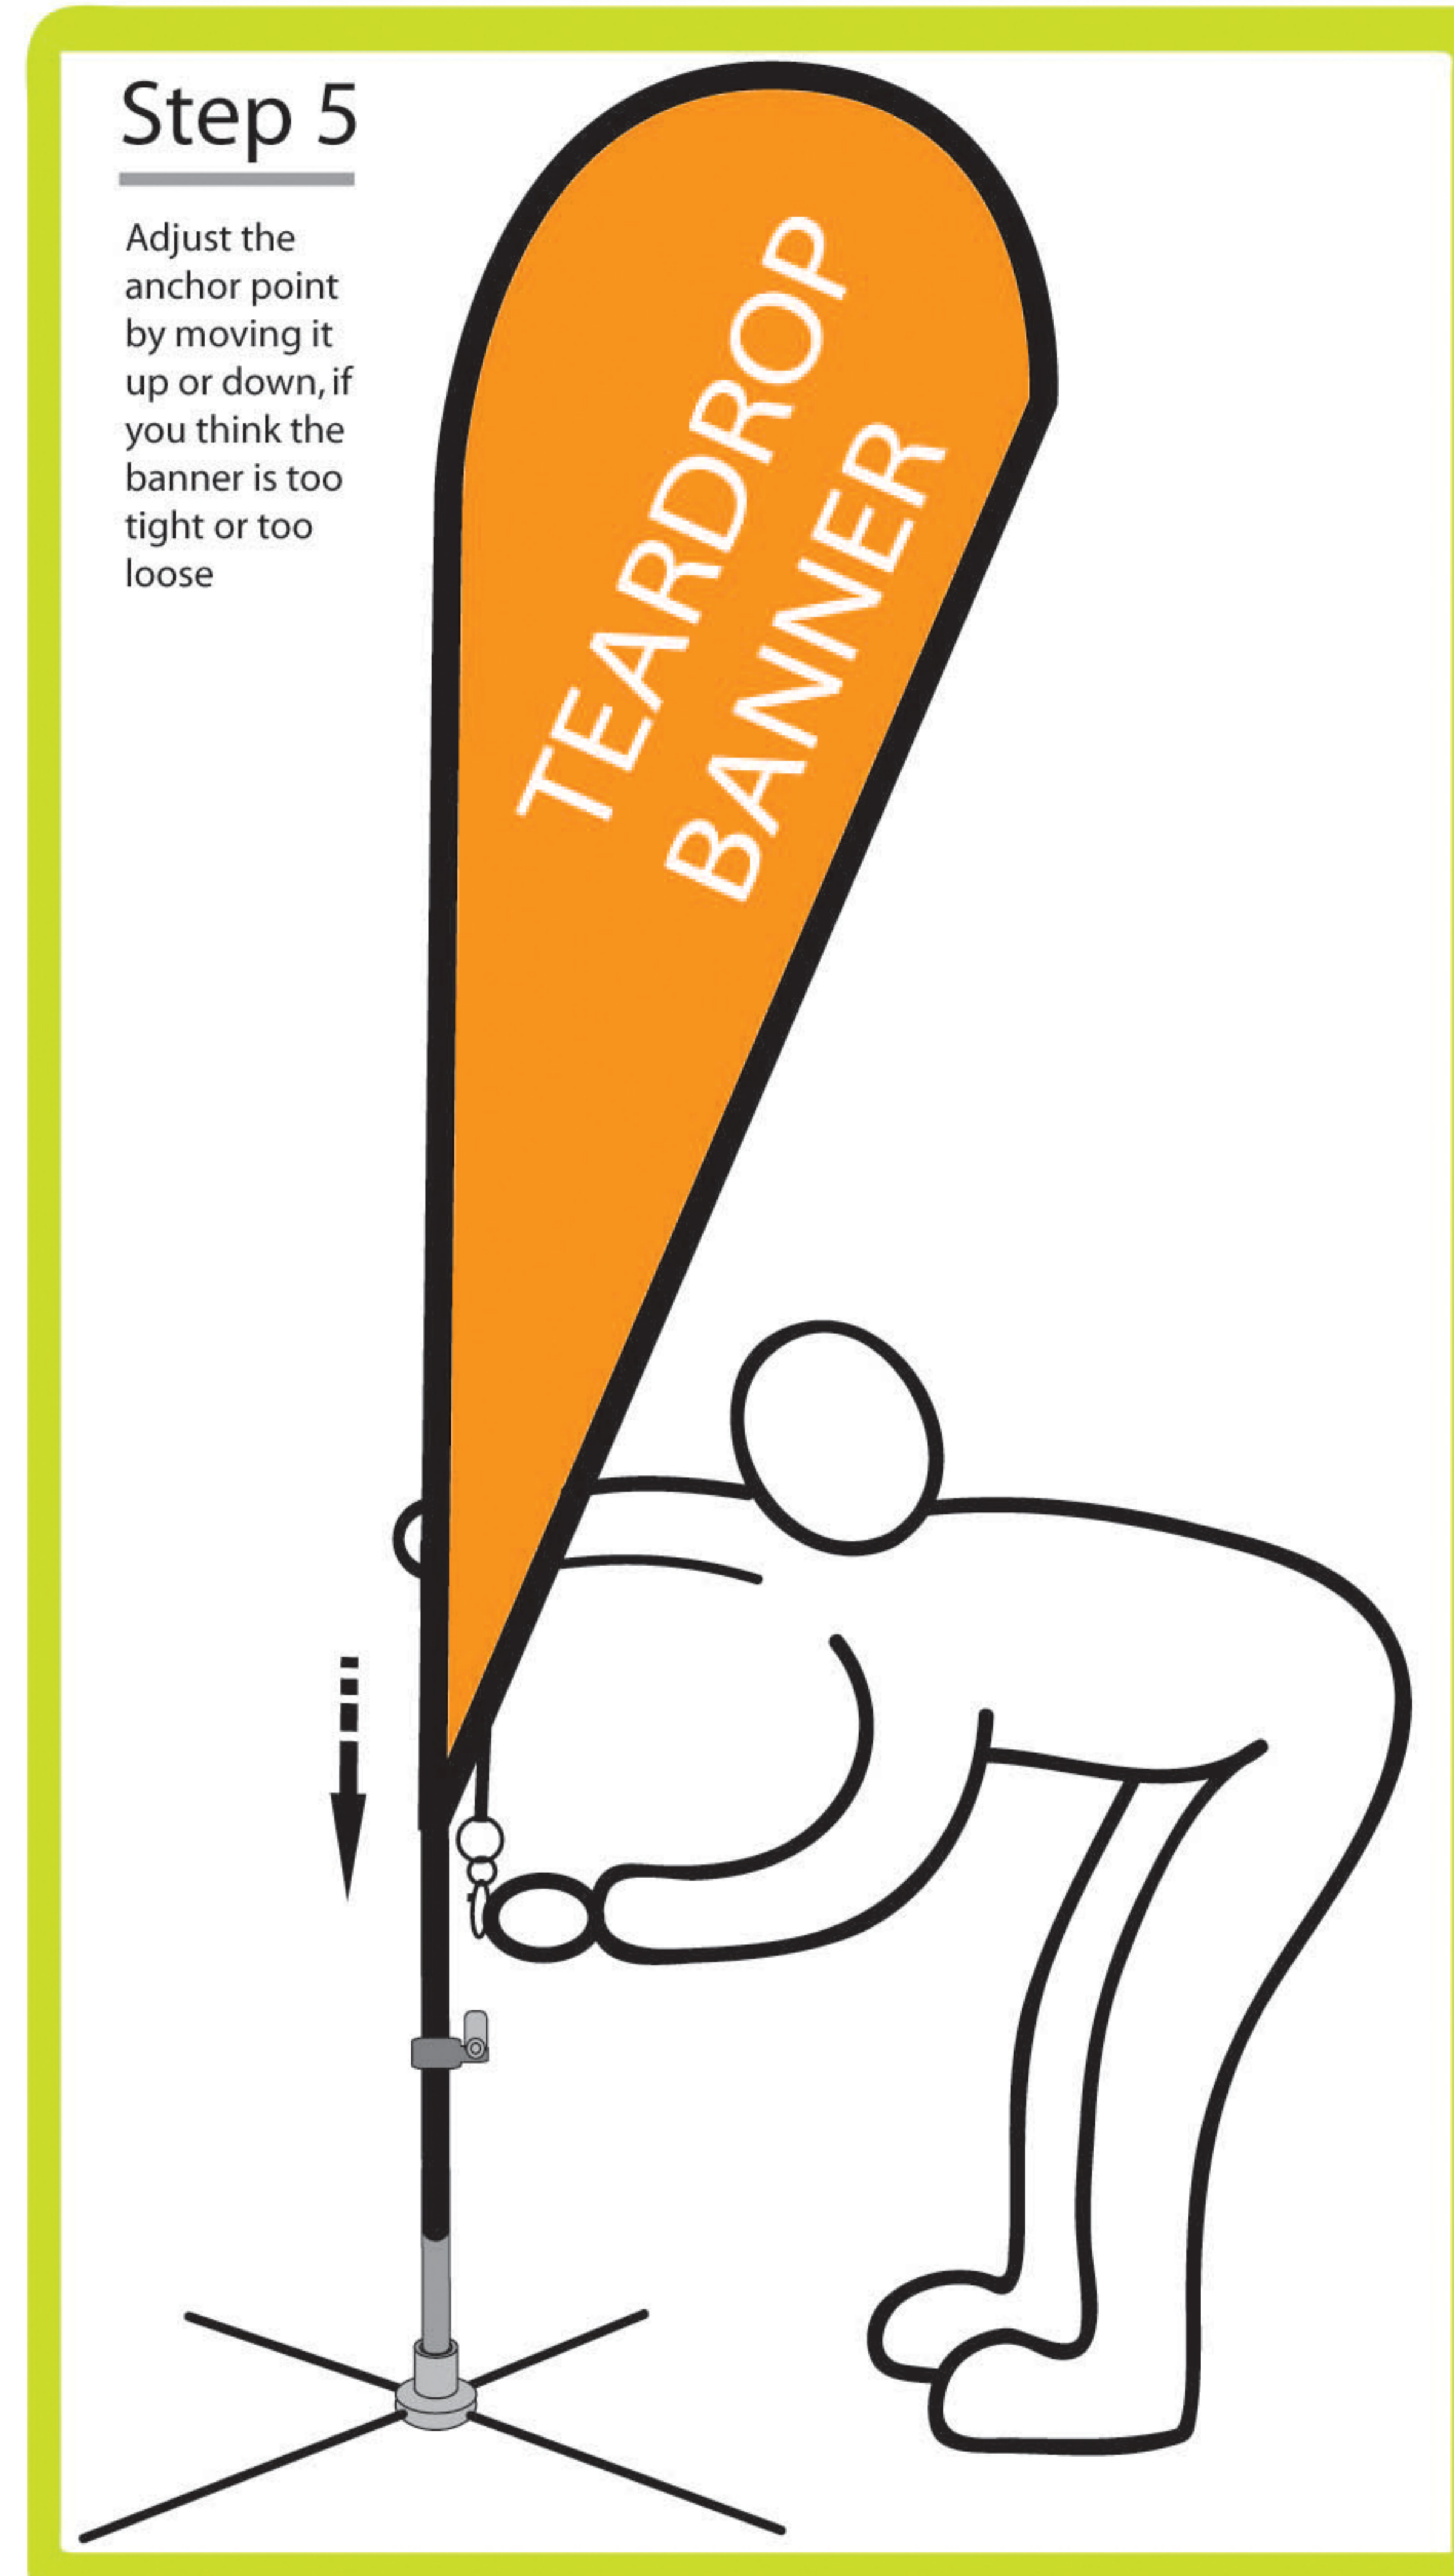

## Step 4

Secure the metal spring clip on the bottom of the banner to the moveable anchor point on the bottom rod

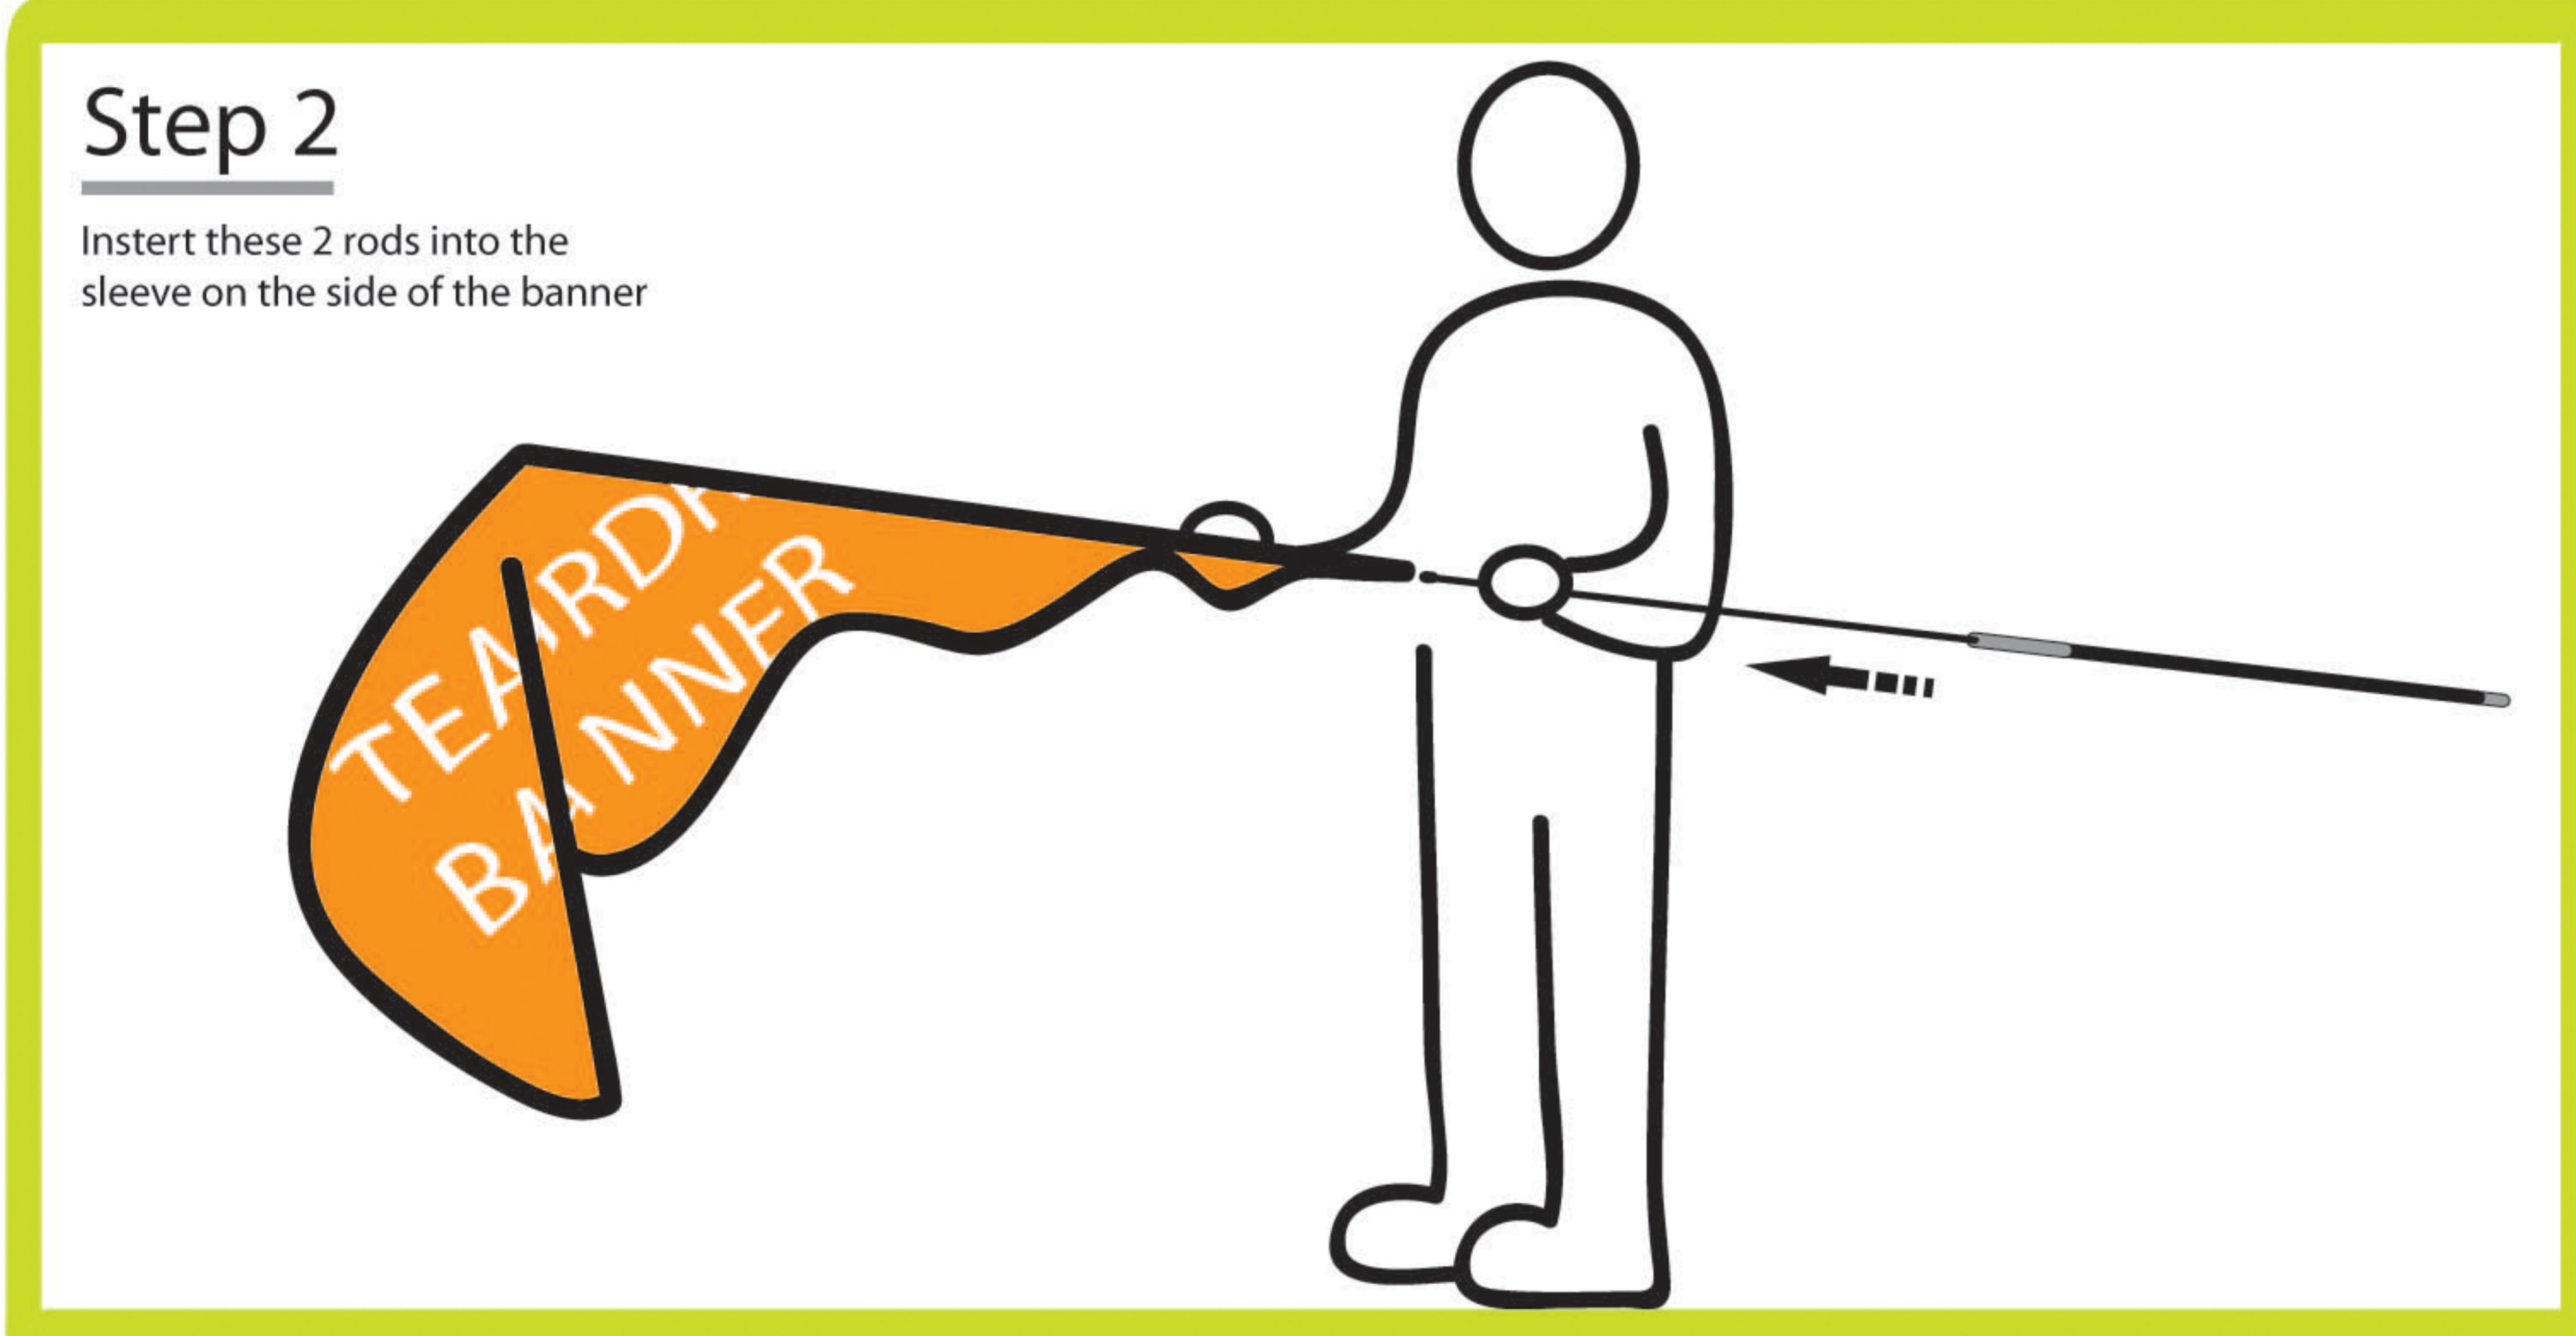

## Step 5

Adjust the anchor point by moving it up or down, if you think the banner is too tight or too loose

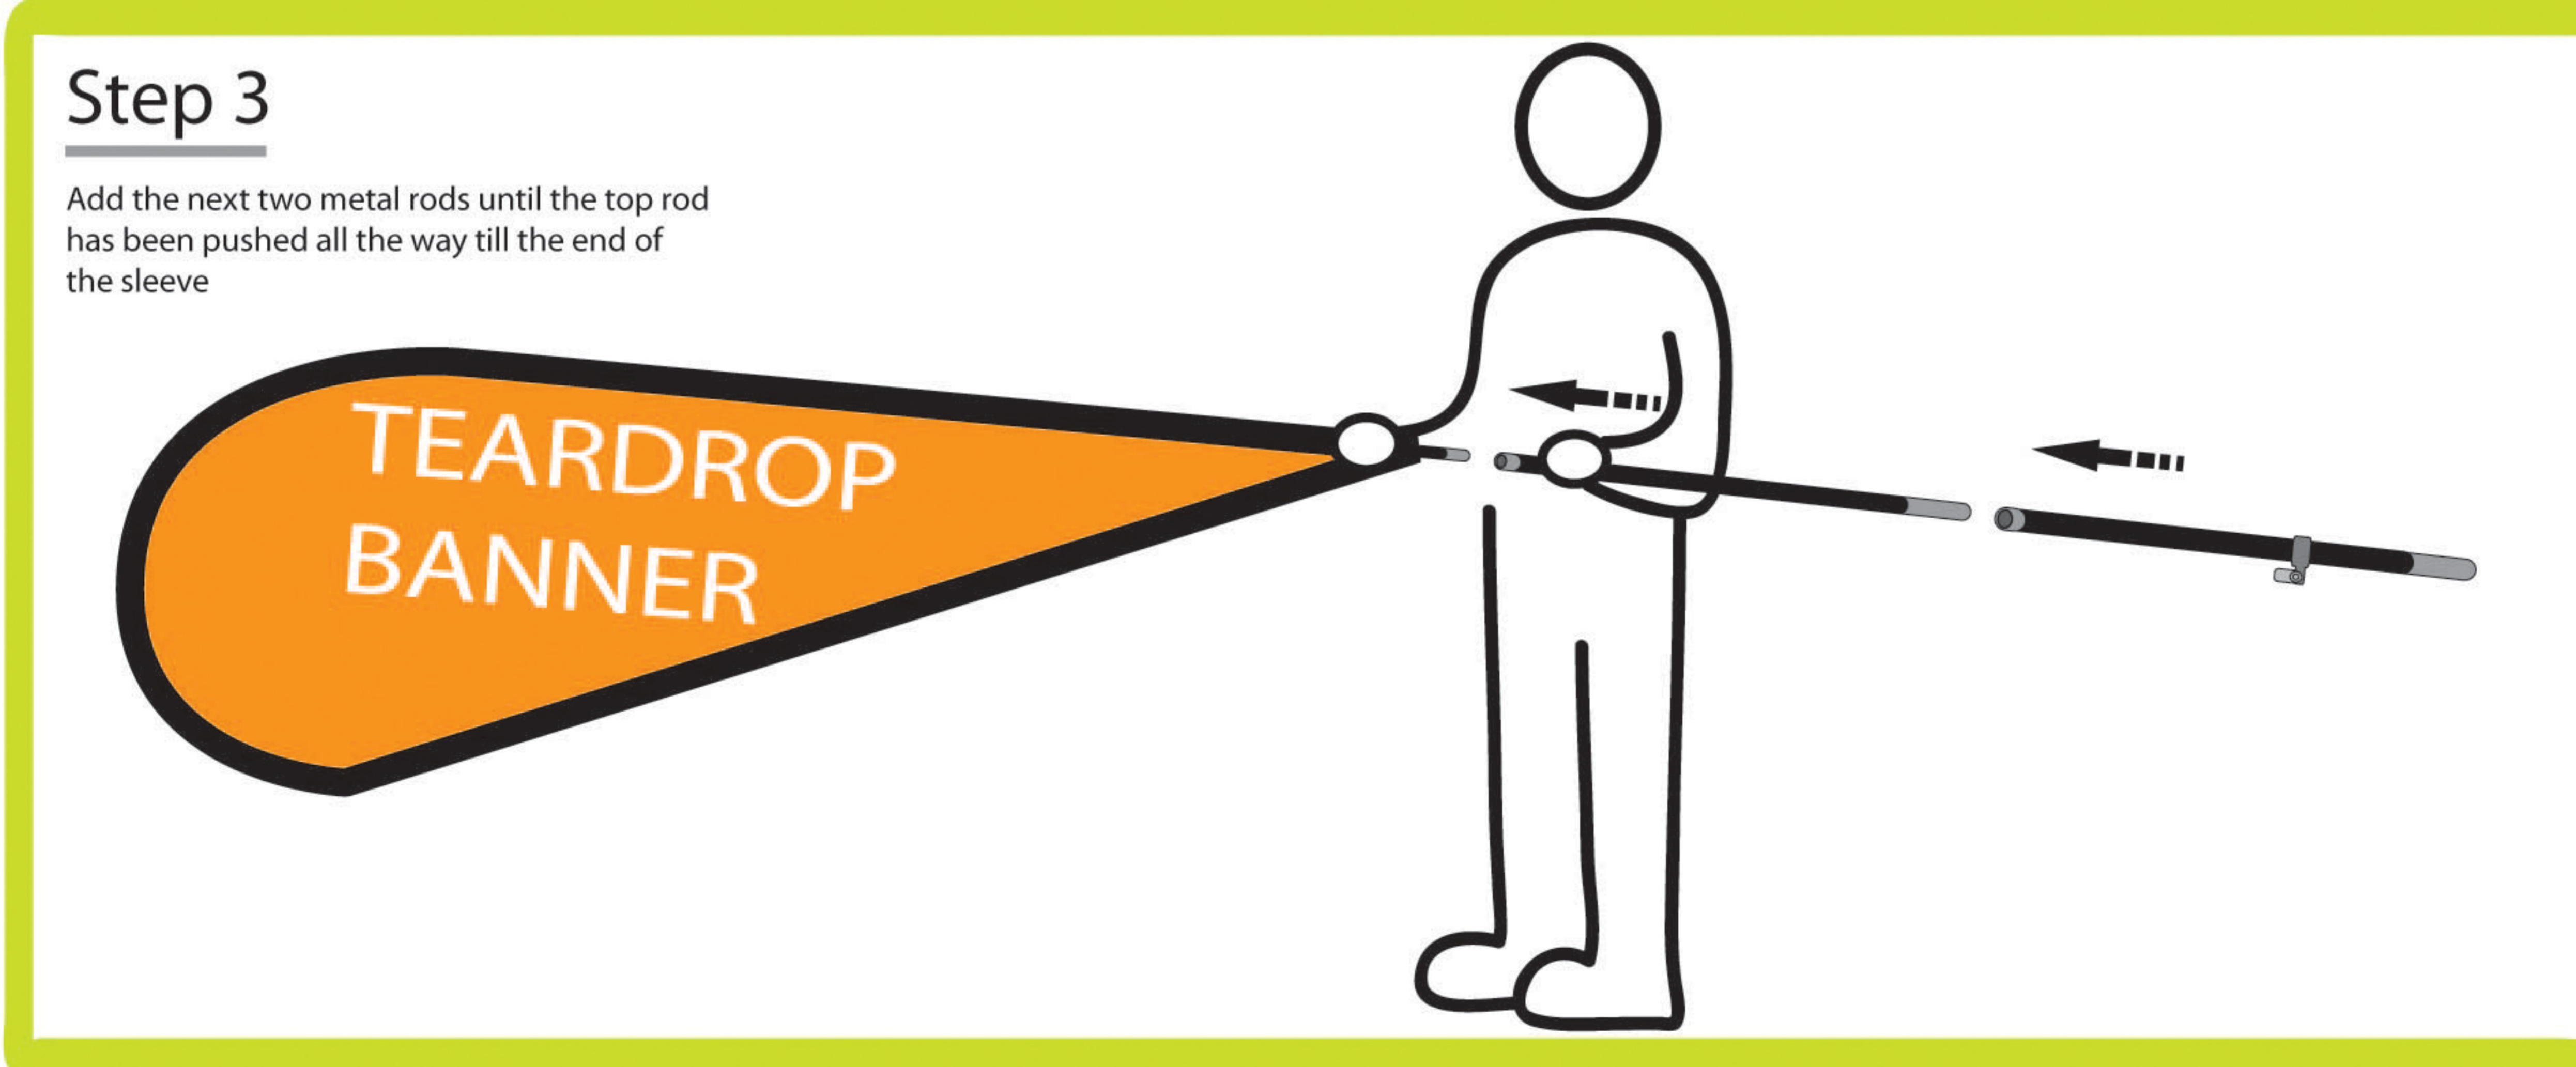

## Step 2

Insert these 2 rods into the sleeve on the side of the banner

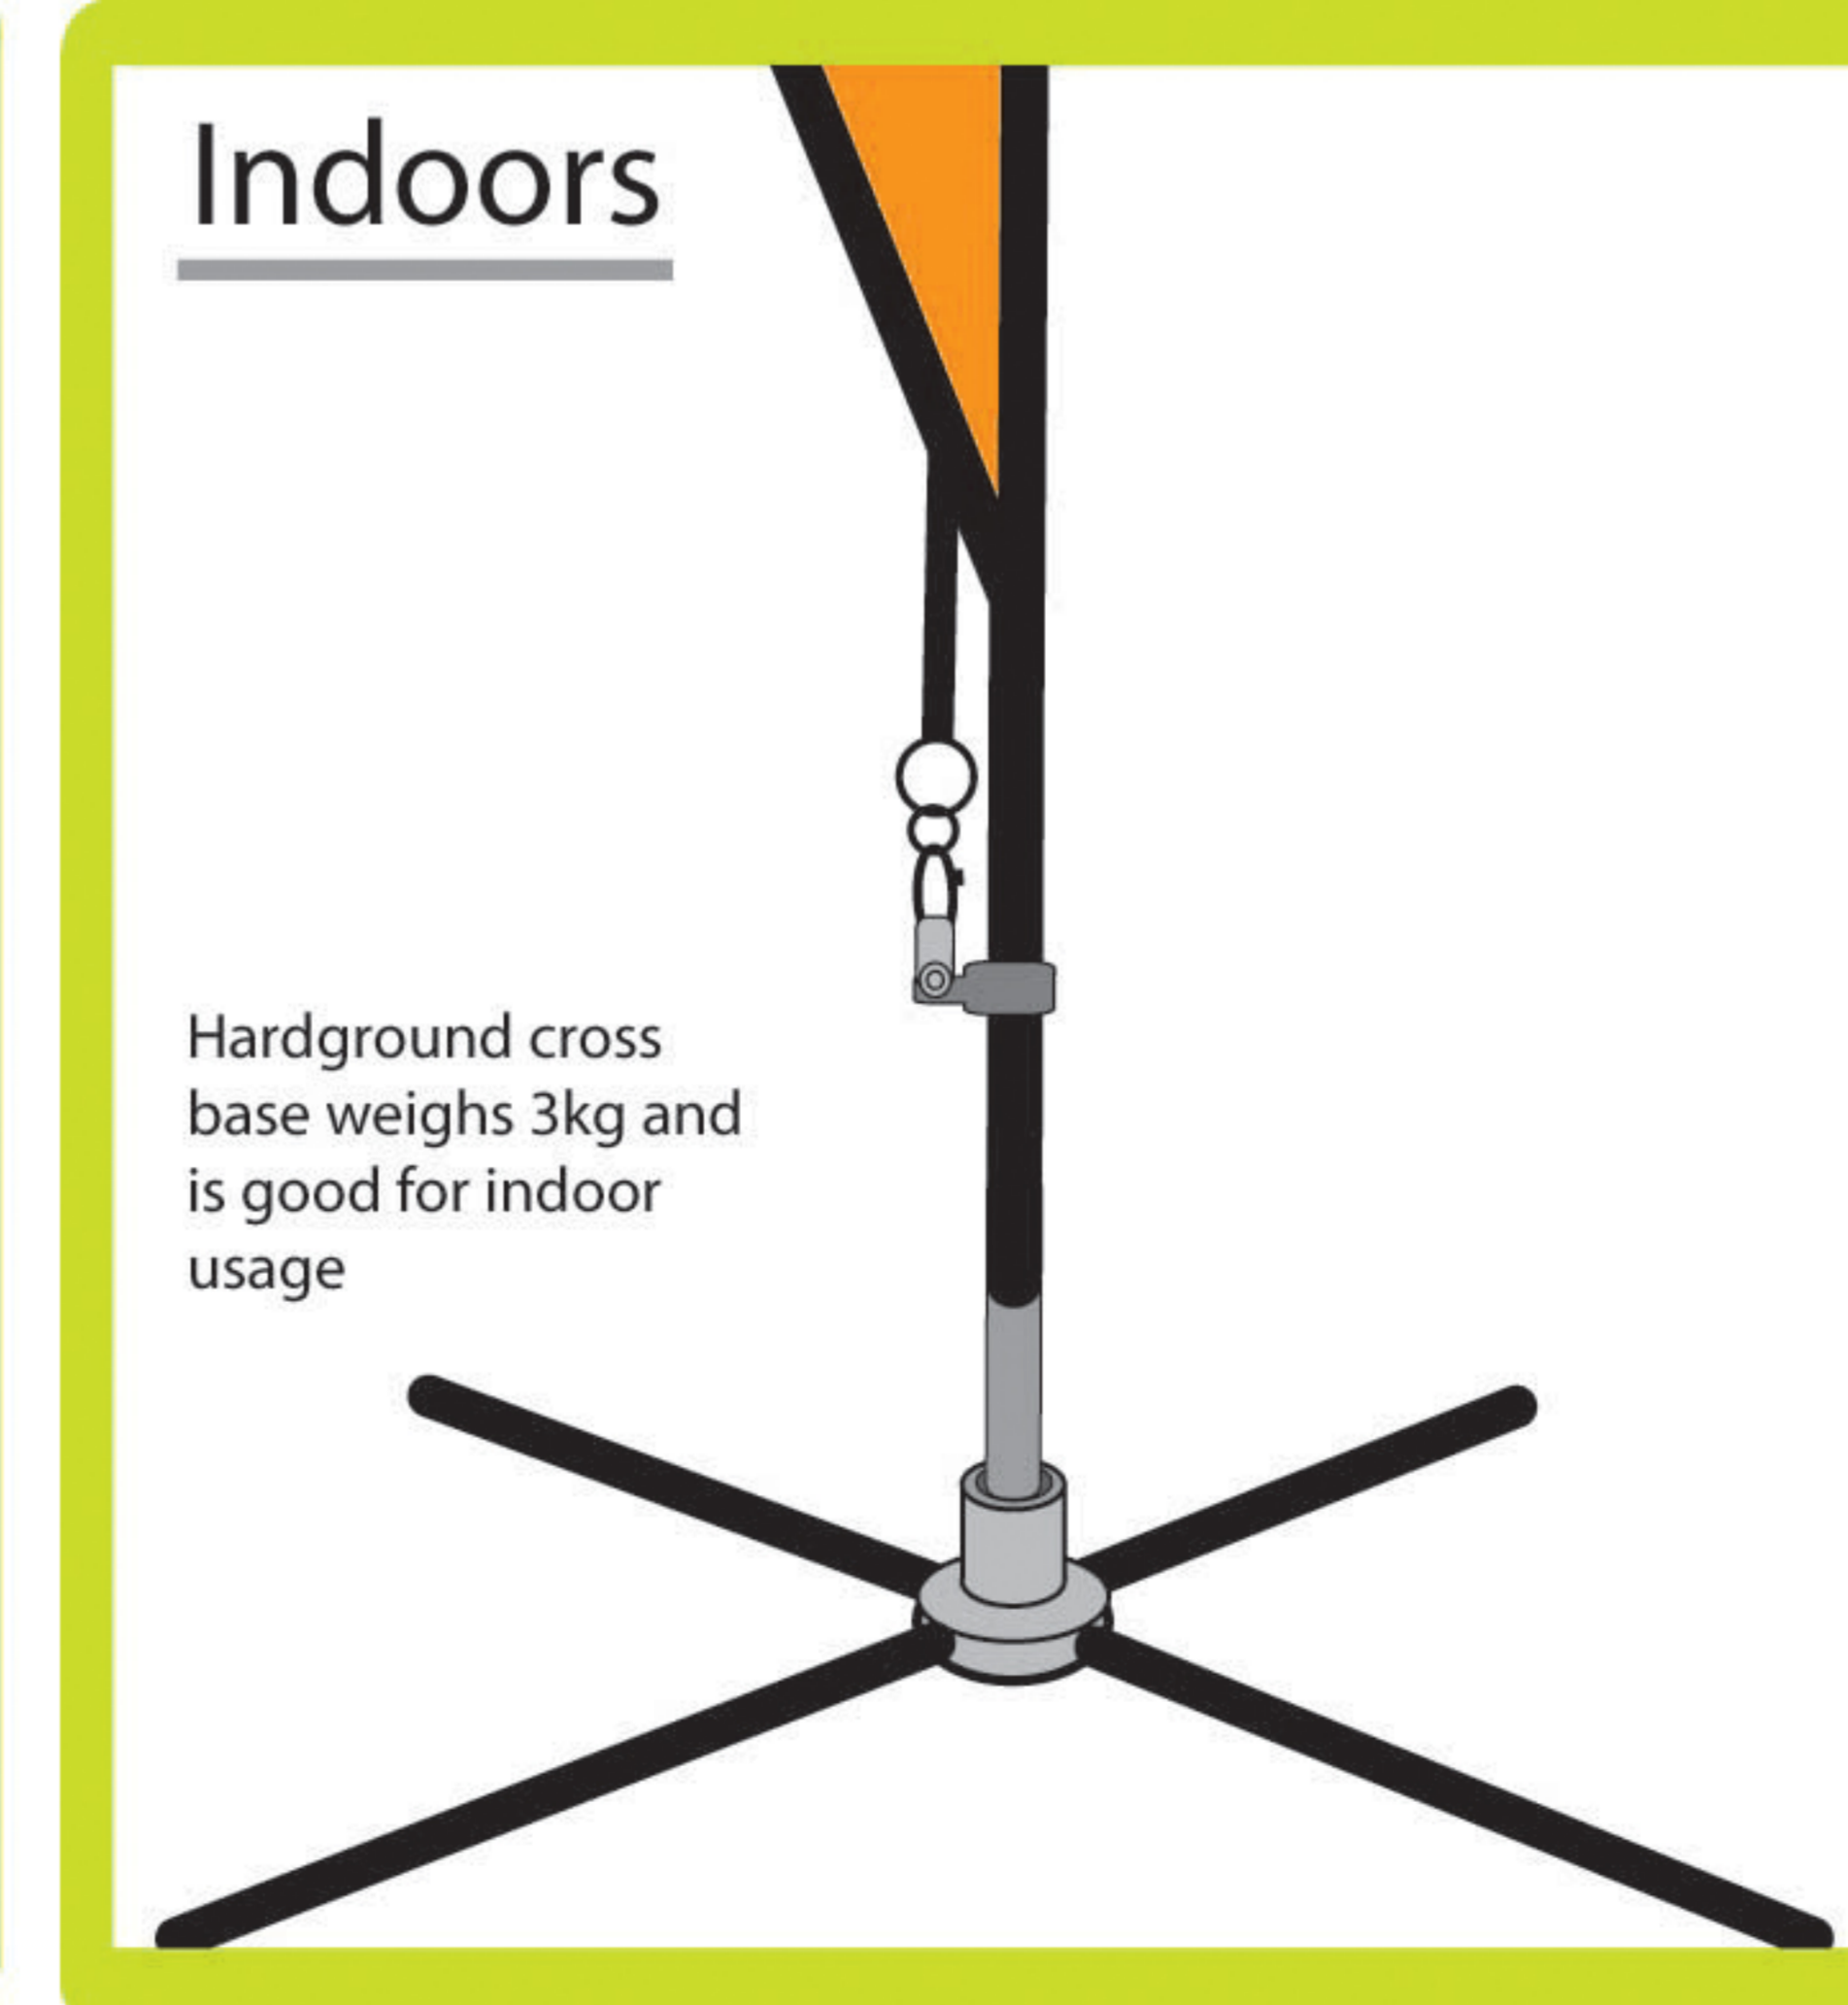

## Step 3

Add the next two metal rods until the top rod has been pushed all the way till the end of the sleeve

## Indoors

Hardground cross base weighs 3kg and is good for indoor usage

## Outdoors

Water bag is included for each hard ground cross feet base. After water filled in, the weigh is 9kg and we highly recommended use in outdoors.
